ABSTRACT

Results of the 1984 Attrition/Retention Survey of the State University of New York are presented. After a brief narrative summary of the findings, extensive data on attrition, retention, and completion are provided for: full-time, first-time students and full-time transfer students at the associate and baccalaureate degree levels; and students in "postsecondary opportunity programs" at the associate- and baccalaureate-degree levels. For all cohorts, the attrition and retention data were measured retrospectively as of the fall 1983 semester. Data are provided on regular bachelor's degree students entering in fall semesters 1978, 1979, 1980, 1981, and 1982; regular associate degree students entering in fall 1980 through fall 1982; baccalaureate opportunity students entering in fall 1977 and 1978; and associate-level opportunity students entering in 1979 and 1980. Both headcount and percentage data are presented from a university-wide perspective, by institution type, and by institution. The data indicate that at the bachelor's degree level, transfer students were more likely than first-time students to complete a degree. Compared to the community colleges, the agricultural and technical colleges had a higher percentage of associate degree recipients and a lower percentage of associate-degree students who left without a degree. # ATTRITION AND RETENTION OF FULL-TIME STUDENTS IN BACCALAUREATE AND ASSOCIATE DEGREE PROGRAMS

## CLASS OF 1982

## AND

## Partial History of Later Cohorts as of Fall 1983

Full-Time, First-Time Students in Baccalaureate Programs Entering Fall 1978 — Fall 1982; Including Postsecondary Opportunity Students Entering Fall 1977

Full-Time, Transfer Students in Baccalaureate Programs Entering Fall 1979 — Fall 1982; Including Postsecondary Opportunity Students Entering Fall 1978

Full-Time, First-Time Students in Associate Degree Programs Entering Fall 1980 — Fall 1982; Including Postsecondary Opportunity Students Entering Fall 1979

Full-Time, Transfer Students in Associate Degree Programs Entering Fall 1981 — Fall 1982; Including Postsecondary Opportunity Students Entering Fall 1980

# INTRODUCTION

This report summarizes the responses of the State University of New York constituent institutions to the 1984 Attrition/Retention Survey administered by the Central Office of Institutional Research. This publication presents State University of New York system-wide information on student completion, retention and attrition.

The significant factors in the development of a student's academic career and plans are varied and diverse; consequently, there are innumerable questions that may be asked regarding student retention and attrition. These questions are increasingly important to academic and fiscal planning and evaluation. Any study which involves the tracking of individuals over a period of time tends to be time-consuming and complex. Because of the desirability of designing a study that would yield significant information and still be capable of execution in a reasonable period of time, the questions formulated for purposes of this study have been restricted to those which could be answered by an examination of permanent records and transcripts. Within these restrictions, this study was designed to answer some fundamental questions of the groups examined, e.g., how many received awards and how many did not? Of those that received an award, when was the award received in terms of normal expectations? Of those that did not receive an award, how many were still enrolled? In the case of associate degree programs, how many of those who received an award or did not receive an award and were no longer attending, transferred to another college? More detailed information on the design and assumptions of the study will be found in the section titled "Methodology".

The data presented in this report were collected as of the Fall 1983 semester on: (a) five cohorts of full-time, first-time students in baccalaureate degree programs; (b) four cohorts of full-time, transfer students in baccalaureate degree programs; (c) three cohorts of full-time, first-time students in associate degree programs; (d) two cohorts of full-time, transfer students in associate degree programs; (e) one cohort of full-time, first-time postsecondary opportunity students in baccalaureate degree programs; (f) one cohort of full-time, transfer opportunity students in baccalaureate degree programs; (g) one cohort of full-time, first-time postsecondary opportunity students in associate degree programs and (h) one cohort of full-time, transfer opportunity students in associate degree programs. The inclusion of several cohorts allows for the examination of retention and completion without having to wait a full five years for baccalaureate program cohorts or a full three years for associate program cohorts. The data reported have been expanded to include attrition and retention information for postsecondary opportunity students.

This report is organized into four parts. Part One provides attrition, retention and completion information for full-time, first-time and full-time, transfer students in Baccalaureate Degree Programs. Part Two

contains similar information for students enrolled in Associate Degree Programs. Part Three includes attrition, retention and completion information for full-time, first-time and full-time, transfer postsecondary opportunity students enrolled in Baccalaureate Degree Programs. Part Four provides similar information for postsecondary opportunity students in Associate Degree Programs.

The tables presented in each part of this report include headcount and percentage data from a system-wide perspective, by campus type and by campus.

The accumulation of information contained in this study involved a great deal of work on the part of individual campuses. We appreciate the cooperation and effort that went into providing these data. We would also like to thank our statistical staff, Mr. Roy Spoor, Mss. Evelyn Smith and Susan Bossoni for their efforts in preparing the statistical information in the report and Ms. Vikki Mazzone who was responsible for the typing and mailing of the survey to the campuses. Finally, a thank you for our secretarial and support staff, Mss. Carol Hart, Peg Rings, Vikki Mazzone, and Joelle Lydon who prepared the manuscript for publication.

## METHODOLOGY

The problem of "measuring" student attrition and retention in an instructional program is complicated by a number of factors - some technical and some conceptual. Among the latter is the fundamental problem of defining the concept of attrition in an operationally significant manner. Regardless of its original meaning, the term 'attrition' as it is used within the context of higher education involves the concept of failure to achieve some goal or objective. It would, consequently, be improper to include within attrition figures a student who entered an undergraduate college and completed only one year of study if that student had no commitment to a program of study leading to a formal degree, or no commitment to a specific goal which was not achieved.

The basic approach utilized in this study was to identify, each Fall, a group of full-time students enrolled in a degree program - called the "total cohort" - and to arrive at attrition/retention information by tracking the cohort through the institution. The reason for selecting a cohort of full-time students enrolled in a degree program was that they, by virtue of their enrollment, expressed a commitment to definable objectives. Specifically, they were committed to (i) full-time study and (ii) attaining a degree. This study is organized so as to provide information regarding the relative success of the cohort in achieving their goals.

The study examines: (i) those students enrolled in Baccalaureate Degree Programs, and (ii) those students enrolled in Associate Degree Programs. If comparisons are made between the two cohorts, a word of caution is advisable. It should be remembered that a student who enrolls in a baccalaureate degree program and leaves the institution after two years without a degree, will be counted as failing to achieve his objectives. Whereas, a student enrolled in an associate degree program who receives a degree will have met her objectives. Yet, both students may have completed essentially the same course work and performed at essentially the same level of competence. Generally, a four-year institution does not give a formal degree for completing two years of study while a two-year institution does, thus, comparisons between the two cohorts with respect to ability and achievement should be made with caution.

Attrition/retention data in Baccalaureate Degree Programs are based on full-time, first-time students who entered in Fall 1978, Fall 1979, Fall 1980, Fall 1981 and Fall 1982 as well as, full time, first-time post-secondary opportunity students entering Fall 1977. In addition, data was collected on full-time transfer students in Baccalaureate Programs who entered in Fall 1979, Fall 1980, Fall 1981, Fall 1982 as well as, full-time, transfer opportunity students entering Fall 1978. Each cohort was divided into those who received a degree, thereby achieving their baccalaureate educational objectives, and those who did not receive a degree. Of those who did not receive a degree, the number still persisting/still enrolled in the institution, either part-time or full-time, were reported. Degree recipients were also reported in terms of the conventional four-year time

frame, i.e. those graduating early, those graduating four years after admission, or those graduating later. All data were collected as of the end of the Fall 1983 semester, therefore, many students in the most recent cohorts will be reported as persisters/still enrolled.

It would be incorrect to infer that students who are no longer enrolled have abandoned their educational objectives. They may or may not have abandoned their original goals. All that is known for certain regarding the students who are no longer enrolled is that, for reasons which we do not have, their relationship with the institution has ceased. Again, a cautionary note, the reasons for leaving the institution may be many and varied, e.g., financial, academic, abandonment of original objectives, illness, desire to attend another institution, or any variety of personal and non-personal reasons. Consequently, inferences made from the data regarding students no longer enrolled should be made with caution.

Attrition/retention data in Associate Degree Programs are based on full-time, first-time students who entered in Fall 1980, Fall 1981, and Fall 1982 as well as, postsecondary opportunity students entering Fall 1979. Additionally, data were collected on full-time transfer students in Associate Programs who entered in Fall 1981 and Fall 1982 as well as, transfer opportunity students entering Fall 1980. The divisions of each cohort are similar but not identical to the divisions utilized for baccalaureate degree students. Consequently, the same cautionary notes apply. The major difference in the case of the associate degree programs is that additional information is provided regarding the number and distribution of students who transferred to another college. This additional information was sought in the case of the associate degree programs since many of these programs are designed to be university parallel programs leading to transfer to another institution.

In interpreting the data for attrition in Associate Degree Programs, it should be noted that those students whose ultimate objective is to receive a baccalaureate degree may, because of limitations on the transferability of credits and other factors, perceive it to be in their best interest not to complete the associate degree program. Consequently, some students may not receive a formal award in a two-year program by prior design. In this instance, therefore, attention should be given to the students who do not receive an associate degree but do transfer to another college.

All of the institutions of the State University of New York which had students meeting the conditions for inclusion in this study, responded to the survey. However, a few campuses were unable to respond completely and they are noted in the summary tables of the report.

## Summary of Data

This is the fifth Attrition and Retention publication of the Central Office of Institutional Research (see Publications List in the Appendix). It reports the results of the 1984 Attrition/Retention Survey of the State University of New York.

The format of the Survey has been modified since the last publication, consequently, the presentation of data in this report has changed from the preceding publications.

Part One presents information on the history of full-time, first-time and full-time, transfer students enrolled in Baccalaureate Programs. First-time cohorts include those entering Fall 1978 (Class of 1982) through Fall 1982 (Class of 1986) and transfer cohorts include those entering Fall 1979 through Fall 1982. Data for each of these cohorts were reported retrospectively as of the Fall 1983 semester. Both headcount and percentage data are presented from a university-wide perspective, by institution type and by institution.

An examination of the data for the Class of 1982 Baccalaureate Degree Programs indicates an overall degree completion rate of 50.58 percent, and an overall attrition rate of 47.01 percent with 2.41 percent of the entering cohort still enrolled five years after admission. At the institutional level, the highest percentage of degree recipients were reported for the Statutory Colleges (83.33 percent), followed by the Specialized Colleges, which were represented by one campus (70.45 percent), next the University Centers (54.15 percent), followed by the University Colleges (45.03 percent). At the institutional level, attrition rates for full-time, first-time students in Baccalaureate Programs followed a similar pattern. The lowest percentage of attrition was reported by the Statutory Colleges (15.03 percent), next the Specialized Colleges (29.55 percent), followed by the University Centers (42.81 percent) with the highest percentage of attrition reported by the University Colleges (52.88 percent). Examination of campus responses by institution demonstrates that there were exceptions to University and institutional norms for first-time Baccalaureate students.

Data on the overall degree completion rate of full-time, transfer Baccalaureate students, indicate that 64.38 percent of the Fall 1979 entering cohort completed a Baccalaureate Degree Program. Moreover, Baccalaureate students transferring at the upper division level have the highest degree completion rate, 69.67 percent, while lower division transfers have a 56.51 percent degree completion rate. These data indicate that transfer students in Baccalaureate Programs are more likely than the first-time students to complete a degree program. This was particularly true for students transferring at the upper division program level. Attrition levels for transfer Baccalaureate students (33.30 percent) are lower than for first-time students (47.01 percent) with upper division transfers having the lowest percentage of attrition (28.96), followed by lower division transfer

students (39.96 percent). Examination of Baccalaureate transfer attrition and retention data indicates exceptions by institutional type and at the campus level.

Part Two presents headcount and percentage tables for full-time, first-time students in Associate Degree Programs entering Fall 1980 through Fall 1982 and full-time, transfer students entering Fall 1981 and Fall 1982. Data for each cohort is measured retrospectively as of the Fall 1983 semester.

An examination of data for the Class of 1982 Associate Degree Programs shows an overall degree completion rate of 40.95 percent for full-time, first-time students with 16.48 percent of the degree recipients transferring to another institution and 6.03 percent of the entering cohort still enrolled. The total attrition rate for the Class of 1982 was 52.13 percent and 16.51 percent of those who left the University without a degree transferred to another institution. At the institutional level, the Agricultural and Technical Colleges had a higher percentage of degree recipients (59.17 percent) and a lower attrition rate (39.79 percent) than the Community Colleges who had a degree completion rate of 35.66 percent and an attrition rate of 55.71 percent. The percentage of students who transferred to another institution after earning an Associate Degree was higher for the Agricultural and Technical Colleges (18.21 percent) than for the Community Colleges (16 percent). However, the percentage of students who transferred after leaving the institution without a degree was higher for the Community Colleges (19.50 percent) than for the Agricultural and Technical Colleges (6.2 percent). Furthermore, the percentage of students from the entering cohort still enrolled after three years was higher for the Community Colleges (7.54 percent) than for the Agricultural and Technical Colleges (.81 percent). Exceptions to these norms were evident at the individual campus level.

Data reported on the overall degree completion of full-time, transfer Associate students entering Fall 1981 show a higher degree completion rate (47.84 percent) than for first-time students (40.95 percent), and a lower attrition rate (38.53 percent) than for first-time students (52.13 percent). However, when compared to first-time students, fewer transfer degree recipients (15.71 percent) and fewer transfer students who left without a degree (11.11 percent), transferred to another campus. For first-time students the post-graduation transfer rate was 16.48 percent and 16.51 percent for those who dropped out without receiving a degree. At the Associate institutional level, a completion and attrition pattern similar to that of the first-time students emerged. The Agricultural and Technical Colleges had a higher percentage of degree recipients (55.05 percent) and a lower percentage of students who left the institution without a degree (31.79 percent) than the Community Colleges who had 45.65 percent completion and 40.48 percent attrition rates. The Agricultural and Technical Colleges and the Community Colleges had similar percentages of students still enrolled (approximately

13 percent) and similar transferral rates after graduation (approximately 16 percent). However, for students who left the University without a degree, a transfer pattern similar to that of first-time Associate students was observed, i.e., the Community Colleges had a higher percentage of students who transferred (12.96 percent) than did the Agricultural and Technical Colleges (4.44 percent). An examination of data at the campus level indicates several exceptions to the above University and institutional norms.

Part Three presents data, for the first time, on postsecondary opportunity students in Baccalaureate Degree Programs. Both headcount and percentage information are provided for full-time, first-time students entering Fall 1977 and for full-time, transfer students entering Fall 1978. Data were reported retrospectively as of the Fall 1983 semester.

Examination of the first-time cohort data indicates an overall Baccalaureate degree completion rate of 21.51 percent and an attrition rate of 75.64 percent. The Specialized Colleges are an exception to this pattern with a higher percentage of opportunity degree recipients (42.86 percent) and a lower attrition rate (57.14 percent) than the University norms. Both the University Colleges and the University Centers followed the normative patterns for degree completion and attrition rates. First-time, postsecondary opportunity students in Baccalaureate Programs had the lowest percentage of degree recipients and the highest percentage of students dropping out of the University without a degree, than did the first-time or transfer students enrolled in Baccalaureate Degree Programs. Individual campuses differed from these data patterns.

Degree completion rates improve significantly for transfer opportunity students in Baccalaureate Programs (40.79 percent), with a 31.69 percent completion rate for lower division transfers and a 59.83 percent completion rate for upper division transfers. Attrition rates also improve for transfer opportunity students when compared to first-time opportunity students in Baccalaureate Programs. The overall attrition rate for the transfer opportunity cohort was 57.63 percent with a 66.12 percent attrition rate for lower division transfers and 39.32 percent attrition rate for upper division transfer students. Generally, transfer cohorts have higher completion and lower attrition rates than first-time cohorts. This was also the case for postsecondary opportunity students in Baccalaureate Programs, although their graduation rates were lower and their attrition rates were higher. Institutional level completion and attrition rates for transfer opportunity students varied widely. The Specialized Colleges and the Health Sciences Centers had the highest degree completion rates (approximately 73 percent) and lowest attrition rates (approximately 27 percent). The University Centers were next with completion and attrition rates of 41.18 percent and 56.21 percent, respectively, followed by the University Colleges with 33.33 percent completion and 65.59 percent attrition rates. Individual campuses differed from the institutional completion and attrition patterns for transfer Baccalaureate opportunity students.

Part Four presents attrition/retention data, for the first time, on postsecondary opportunity students enrolled in Associate Degree Programs. Data include both headcount and percentage tables for full-time, first-time students entering Fall 1979 and full-time, transfer students entering Fall 1980. Data were reported retrospectively as of the Fall 1983 semester.

Examination of the data for first-time opportunity students indicates an overall Associate Degree completion rate of 30.22 percent and 8.98 percent of degree recipients transferred to another institution. The degree completion rate (30.22 percent) was higher than the completion rate of first-time opportunity students in Baccalaureate programs (21.51) and lower than the completion rates of other first-time Associate students (40.95 percent). The total percentage of attrition for the same cohort was 63.84 percent and 10.67 percent of these students transferred to another institution. The attrition rate for Associate first-time opportunity students was lower (63.84 percent) than the attrition rates of first-time Baccalaureate opportunity students (75.64 percent) and higher than the attrition rates of other first-time Associate students (52.13 percent). The Agricultural and Technical Colleges had slightly better completion and attrition rates, 38.53 percent and 61.23 percent, respectively and the Community Colleges had slightly poorer completion and attrition rates, 28 percent and 64.54 percent, respectively. An inspection of campus responses by institution indicates exceptions to the University and institutional normative data patterns for first-time Associate opportunity students.

The full-time, transfer cohort of opportunity students entering Fall 1980, had an Associate Degree completion rate of 26.13 percent and an attrition rate of 57.76 percent. Transfer rates for degree recipients were 7.47 percent and 9.23 percent for students who left the University without a degree. This overall degree completion pattern differed from other first-time and transfer cohort comparisons. As discussed, the degree completion percentages were higher for transfer cohorts when compared to those of first-time students. However, the degree completion rates for Associate opportunity transfers were lower (26.13 percent) than for first-time opportunity students (30.22 percent). The student attrition rates followed the established pattern and were lower for transfer opportunity students (57.76 percent) than for first-time opportunity students (63.84) in Associate Programs. Due to the low number of transfer opportunity students enrolled in Associate Degree Programs caution should be exercised when interpreting these data.

[a]The total figures for cohorts entering in Fall 1980, 1981, and 1982 include all of the SUNY Baccalaureate Programs, however the lower and upper division figures exclude SUNY Albany. Thus, the sum of lower and upper division numbers for the Baccalaureate and University Center aggregate will not equal the totals.

85/478

[b]The Fall 1979 cohort excludes Empire State College and the upper and lower division figures also exclude Fredonia and SUNY Albany. Therefore, the total will not equal the sum of its parts.

FOOTNOTES

[a]The total attrition figures represent all of the SUNY Associate Degree Programs. However, data in the columns labeled "Transferred" and "Did not Transfer" excludes the following campuses: Upstate, Empire State, Alfred, Cobleskill, Cayuga, and Finger Lakes. Therefore, the total attrition figures will not sum to the aggregate totals for Associate Degree Programs, Two Year Colleges, Agriculture and Technical Colleges and Community Colleges.

[b]The post graduate status of degree recipients will not equal the total number of degree recipients due to the exclusion of the following campuses from the post graduate figures: Upstate, Empire State, Alfred and Finger Lakes.

FOOTNOTES

[a]The total attrition figures represent all of the SUNY Associate Degree Programs. However, data in the columns labeled "Transferred" and "Did not Transfer" excludes the following campuses: Upstate, Empire State, Alfred, Cobleskill, Cayuga, and Finger Lakes. Therefore, the total attrition figures will not sum to the aggregate totals for Associate Degree Programs, Two Year Colleges, Agriculture and Technical Colleges and Community Colleges.

[b]The post graduate status of degree recipients will not equal the total number of degree recipients due to the exclusion of the following campuses from the post graduate figures: Upstate, Empire State, Alfred and Finger Lakes.

FOOTNOTES

[a]The total attrition figures represent all of the SUNY Associate Degree Programs. However, data in the columns labeled "Transferred" and "Did Not Transfer" excludes the following campuses: Upstate, Forestry, Empire State, Alfred, Cobleskill, Cayuga, Finger Lakes, and Niagara. Therefore, the total attrition figures will not sum to the aggregate totals for Associate Degree Programs, Two Year Colleges, Agriculture and Technical Colleges and Community Colleges.

[b]The post graduate status of degree recipients will not equal the total number of degree recipients due to the exclusion of the following campuses from the post graduate figures: Upstate, Forestry, Empire State, Alfred, Cobleskill, Cayuga, Finger Lakes and Dutchess.

FOOTNOTES

[a]The total attrition figures represent all of the SUNY Associate Degree Programs. However, data in the columns labeled "Transferred" and "Did Not Transfer" excludes the following campuses: Upstate, Forestry, Empire State, Alfred, Cobleskill, Cayuga, Finger Lakes, and Niagara. Therefore, the total attrition figures will not sum to the aggregate totals for Associate Degree Programs, Two Year Colleges, Agriculture and Technical Colleges and Community Colleges.

[b]The post graduate status of degree recipients will not equal the total number of degree recipients due to the exclusion of the following campuses from the post graduate figures: Upstate, Forestry, Empire State, Alfred, Cobleskill, Cayuga, Finger Lakes and Dutchess.

FOOTNOTES

[a]The following SUNY campuses have no transfer opportunity students enrolled in Baccalaureate Programs and are not included in the table: Empire State, Purchase, Buffalo Health Sciences Center, Downstate, Maritime, Optometry, Statutory Colleges at Cornell and Ceramics.

[b]The total figures include all of the SUNY Baccalaureate Programs enrolling transfer opportunity students, however, the lower and upper division figures exclude SUNY Albany and Buffalo Center. Thus, the sum of the lower and upper division numbers for Baccalaureate, University Center, and University College aggregates will not equal the totals.

[c]Old Westbury has no upper division transfer opportunity students.

[d]The Specialized Colleges have no lower division transfer opportunity students.

NOTE: Status of each cohort reported as of Fall 1983 Semester.

NOTE: All footnotes appear at the end of the table.
Status of each cohort reported as of Fall 1983 Semester.

FOOTNOTES

[a]The following SUNY campuses have no transfer opportunity students enrolled in Baccalaureate Programs and are not included in the table: Empire State, Purchase, Buffalo Health Sciences Center, Downstate, Maritime, Optometry, Statutory Colleges at Cornell and Ceramics.

[b]The total figures include all of the SUNY Baccalaureate Programs enrolling transfer opportunity students, however, the lower and upper division figures exclude SUNY Albany and Buffalo Center. Thus, the sum of the lower and upper division numbers for Baccalaureate, University Center, and University College aggregates will not equal the totals.

[c]Old Westbury has no upper division transfer opportunity students.

[d]The Specialized Colleges have no lower division transfer opportunity students.

NOTE: Status of each cohort reported as of Fall 1983 Semester.

FOOTNOTES

[a]Since the following campuses have no first-time postsecondary students enrolled in Associate Degree Programs, they are not included in the table: Adirondack, Clinton, Columbia-Greene, Herkimer, Nassau, Niagara, North Country, Sullivan and Tompkins-Cortland.

[b]The total attrition figures will not equal the sum of the columns labeled "Transferred" and "Did Not Transfer", due to the exclusion of the following campuses from the transfer status figures: Canton, Farmingdale, Cayuga, Dutchess, Mohawk Valley and Westchester.

[c]The post graduate status of degree recipients will not equal the total number of degree recipients due to the partial responses from Canton and Dutchess and the exclusion of Cayuga from the post graduate status.

## FOOTNOTES

[a]The following campuses are not included in the table since they do not have transfer opportunity students enrolled in Associate Degree Programs: Cobleskill, Morrisville, Adirondack, Clinton, Columbia-Greene, Corning, Herkimer, Nassau, Niagara, North Country, Sullivan and Tompkins-Cortland.

[b]The total attrition figures represent all of the SUNY Associate Degree Programs. However, data in the columns labeled "Transferred" and "Did Not Transfer" excludes the following campuses: Canton, Cayuga County, Dutchess, Mohawk Valley, Westchester.

[c]The post graduate status of degree recipients will not equal the total number of degree recipients due to the exclusion of the following campuses from the post graduate figures: Environmental Science and Forestry, Canton, Cayuga, CC Finger Lakes.
